

How It Works

The Homespring™ Central Water Purifier means pure, crystal clear water from every faucet in your home.

1 Inlet

Ultrafiltration membrane technology filters municipal, well, cistern, lake and river water. It is easy to install where the water supply enters the house, generally near a water heater, in new or existing homes.

2 Pre-filter

An optional Activated Carbon Pre-filter improves taste and minimizes unwanted odors.

3 Ultrafiltration Membranes

Ultrafiltration membranes are an effective block against undesirable particles, bacteria, viruses and cysts to provide microbiologically purified water.

4 Continuous Supply

The Homespring™ Central Water Purifier uses normal water pressure to provide a continuous supply of crystal clear, microbiologically purified water. If the power fails the Homespring™ Central Water Purifier continues filtering.

5 Drain

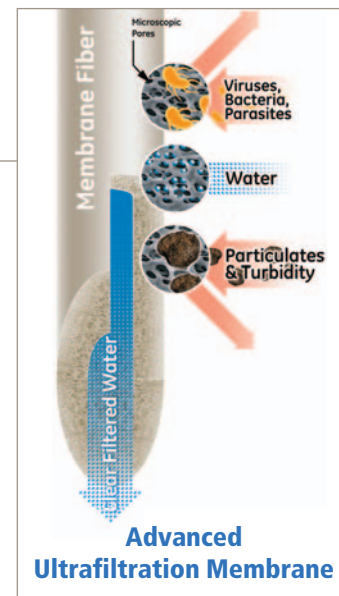

The Homespring™ Central Water Purifier effectively flushes all rejected impurities down the drain during the automatic cleaning cycle.

6 Outlet

Filtered water on demand flows from the Homespring™ Central Water Purifier to the water heater and to every faucet, shower or bath in the home.

7 Automatic Cleaning Cycle

The Homespring™ Central Water Purifier is engineered to automatically flush itself clean at a very efficient rate. It automatically flushes impurities down the drain during your pre-selected time each day.

How the Homespring™ Central Water Purifier compares with other whole-house technologies

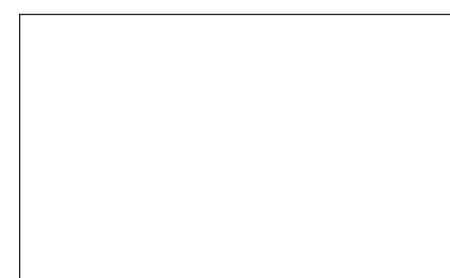

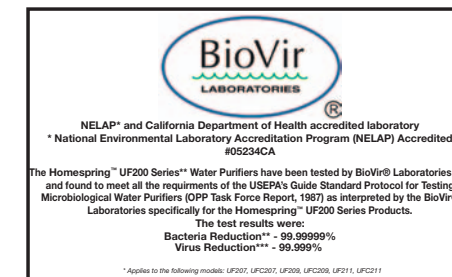

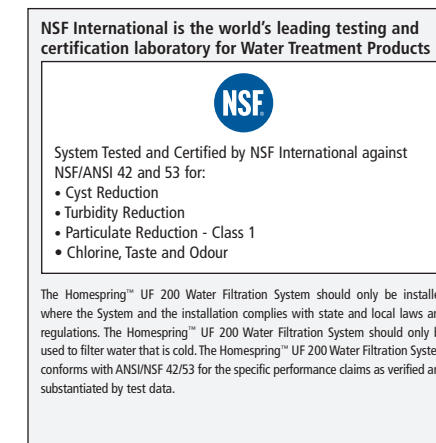

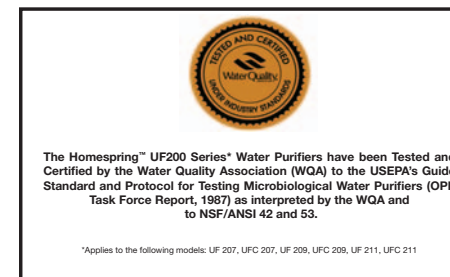

Other treatment methods can't match the experience and superior performance of the Homespring™ Central Water Purifier.

Typical System Capabilities	Homespring™ Central Water Purifier	Ultra-Violet Systems	Ozone Systems	Reverse Osmosis Systems	Chlorine Systems	Carbon Filters
Removes bacteria and viruses	YES*	NO	NO	YES	NO	NO
Removes parasites	YES*	NO	NO	YES	NO	SOME
Efficient self-cleaning	YES	SOME	NO	NO	NO	NO
Keeps filtering when power fails	YES	NO	NO	YES	SOME	YES
Improves taste	YES	NO	SOME	SOME	NO	YES
Removes cloudiness (turbidity)	YES	NO	NO	YES	NO	YES

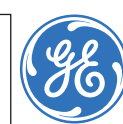

*Please see additional information below.

Additional Information

The Homespring™ Central Water Purifier must be installed by an authorized Homespring™ technician and properly maintained in accordance with the Homeowner's Manual. Failure to properly maintain the system will compromise performance and/or result in a failure to control water quality, which may lead to delivering of contaminated water. Improvements to taste result when the system is used with the optional carbon filter. Water Safety: Please see the certification and independent laboratory results below. Contaminants and pathogens may build-up in a house's piping system and could shed into the water after it has been filtered through the Homespring™ Central Water Purifier. Follow manual instructions, including use of a sanitizer on the piping system to avoid contaminant build-up. Exposure to microorganisms may also occur during daily activities.

Welcome.

It's a New Era for Convenient, Great Tasting, Purified Water at home.

Experts and families agree, the convenient household water revolution is long overdue.

Exotic bottled water, water coolers, jug filters and one-faucet filters are yesterday's news. Modern families want crystal clear, purified water from every faucet in the home, with the help of award-winning ultrafiltration membrane technology from Homespring™.

Innovative, natural and efficient, it's from GE's ZENON Membrane Solutions, the same people who have led the revolution in advanced water filtration products for more

than 25 years. ZENON Membrane Solutions has received numerous awards for its innovative technology as well as for ethical business operations and environmental awareness. Internationally recognized, this patented leading edge technology is used to treat drinking water and wastewater in municipalities, industries and at peacekeeping missions all over the world.

Welcome to a new era for totally convenient, great tasting, purified household water.

Welcome to Homespring™.
Convenient, Great Tasting, Purified Water

Convenient

The Homespring™ Central Water Purifier is installed at the point where water enters the house, providing unlimited, purified water from every faucet in your home without taking up valuable storage space. Virtually maintenance-free, the system self-cleans daily using its own purified water. The Homespring™ Central Water Purifier effectively filters city, well or lake water.

Great Tasting

Enjoying great tasting water is now as easy as turning on your tap. Bottled water taste is now available on demand throughout your entire home.

Purified

The patented Homespring™ Central Water Purifier has been tested and certified to meet the USEPA Standards and Protocols for Testing Microbiological Water Purifiers. This revolutionary Ultrafiltration membrane technology provides purified water by significantly reducing pathogens including bacteria, viruses and cysts. You and your family enjoy peace of mind when drinking, bathing or preparing food with microbiologically pure water from every tap.

Designed for Unlimited Purified Water Supply

Using existing water pressure the Ultrafiltration system provides a continuous supply of microbiologically purified water for your family's needs. Because the system uses a chemical-free advanced physical barrier, bacteria, viruses and cysts are automatically blocked out and flushed away, leaving naturally dissolved healthy minerals in the water.

Award-Winning Technology

GE's ZENON Membrane Solutions continues to win prestigious awards, including recognition for its innovative membrane technology and designation as the country's top corporate citizen.

Popular Science Magazine has also bestowed the Homespring™ Central Water Purifier with the Best of What's New Award in the Home Tech Category. This award recognizes breakthrough technologies and innovations that change the way we live life today and in the future.
